SUBJECT INDEX TO VOLUME 24

The Index to The Nickel Bulletin for 1951 follows the form used in 1950, a consolidated list compiled from the sectional contents lists of the individual issues.

Within the sections normally used (General, Nickel, Electrodeposition. etc.) the items are *broadly classified* in appropriate sub-sections, within which the items are entered *in the order of their appearance in the Bulletin.* The only exception to this order is the grouping of the page numbers of serial items, and of items of very closely similar subject matter, and the arrangement in alphabetical order of the items in the 'General' section.

The individual abstracts are, in most cases, entered under the substantive titles used when they were originally reported. Leading articles and data sheets are listed separately, and are also shown in the appropriate sections: in the sections they are differentiated from abstracts by an asterisk at the beginning of the title.

LEADING ARTICLES

	Page
Physical and Mechanical Properties of Pure Nickel	2-5
Standard Specifications covering Chromium-Nickel Corrosion- and Heat-Resisting Steels	104-5
High-Temperature Materials for Gas Turbines (Iron and Steel Institute Symposium)	116-28
Physical and Mechanical Properties of Monel	224-6

GENERAL

	Page
Brazing of Nickel-containing Materials	128
Chemical Analysis: Of Nickel and Nickel Alloys	28
Methods for Rapid Identification of Metals: A.S.T.M. Symposium	96
Standard Methods: Textbook	250
* Gas Turbines: Review of British Developments	116, 168
Investment Casting of Nickel-containing Materials: Study of Pre-Coats	128
Machinability Ratings of Nickel-containing Materials	6
Machining of Nickel and Nickel-containing Materials	128
Metallurgy: Review of Developments 1929-1950	28
Nuclear Radiation: Effect on Nickel-containing Materials	28
Polishing and Buffing: Literature Review	28
Powder Cutting: Review of Processes	188
Pressure-Welding Process: Application to Nickel-containing Materials	188
Refractories: Textbook	68
Time-Temperature-Transformation Data: Reference Bibliography	48

**Leading Articles.*

NICKEL

	Page
Analysis and Determination	
Detection of Nickel by the Dimethylglyoxime Test	30
Determination of Traces of Nickel in Catalyst Materials	49
Gravimetric Determination of Nickel	97
Spectrophotometric Analysis of Nickel and High-Nickel Alloys	129
Determination of Nickel in Effluents	129
Determination of Nickel in Calcium	130
Alpha-Furildioxime as Reagent for Determination of Nickel	130, 251
Spectrophotometric Estimation of Nickel in Aluminium Alloys	169
Spectrophotometric Estimation of Nickel in Steel	169
Determination of Nickel in Plants	170
Determination of Traces of Nickel in High-Purity Iron Alloys	190
Beta-Isothioureidopropionic Acid as Reagent for Determination of Nickel	190
Separation of Nickel from Other Metals by Chromatographic Analysis	229
Estimation of Sulphur in Nickel	227

SUBJECT INDEX TO VOLUME 24

The Index to The Nickel Bulletin for 1951 follows the form used in 1950, a consolidated list compiled from the sectional contents lists of the individual issues.

Within the sections normally used (General, Nickel, Electrodeposition. etc.) the items are *broadly classified* in appropriate sub-sections, within which the items are entered *in the order of their appearance in the Bulletin.* The only exception to this order is the grouping of the page numbers of serial items, and of items of very closely similar subject matter, and the arrangement in alphabetical order of the items in the 'General' section.

The individual abstracts are, in most cases, entered under the substantive titles used when they were originally reported. Leading articles and data sheets are listed separately, and are also shown in the appropriate sections: in the sections they are differentiated from abstracts by an asterisk at the beginning of the title.

See overleaf for Patents Index.

PATENTS

Aarnisalo, S. A. 218.
Allegheny - Ludlum Steel Corporation, 93, 220, 221.
Alloy Research Corporation, 165, 166.
American Brass Company, 165.
Arden, T. V. 219.
Armco Steel Corporation, 92, 165, 166, 221, 222.

Bailey, G. L. J. 220.
Bartlett, K. M. 222.
Battelle Development Corporation, 164.
Beaver, W. W. 164.
Bell Telephone Laboratories, Inc. 26.
Bethlehem Steel Company, 222.
Binder, W. O. 166.
Blackwood, P. F. 26.
Gebr. Böhler & Company, A. G. 222.
Brenner, A. 92.
British Non - Ferrous Metals Research Association, 220.
British Piston Ring Company, Ltd. 92.
British Thomson-Houston Company, Ltd. 220.
Brown, H. 26.
Brown, John, Ltd. *see* Firth, Thos.
Bryk, P. B. 218.
Burstall, F. H. 219.

Canadian Westinghouse Company, Ltd. 221.
Carpenter Steel Company, 222.
Case, B. C. 26.
Champion Paper & Fibre Company, 92.
Chapman Valve Manufacturing Company, 93.
Ciba, Ltd. 92.
Cie. Française Thomson-Houston, 222.
Clarke, W. C. 92, 165.
Cleveland Graphite Bronze Company, 25.
Columbus Metal Products, Inc. 165.
Comley, M. A. 92.
Crucible Steel Company of America, 93.

Davies, G. R. 219.
Dean, K. C. 91.
Defranoux, J. M. 93.
Dehn, F. B. 94.
Doran, R. F. 220.
Driver-Harris Company, 93.
Dubois, E. 220.

Ekstrand & Tholand, Inc. 219.
Electrical & Musical Industries, Ltd. 165.
Electro - Metallurgical Company, 166.
Electro-Metallurgical Company of Canada, Ltd. 222.
Elgin National Watch Company, 94.
Enthone, Inc. 220.
État Français, 220.

Falconbridge Nickel Mines, Ltd. 164.
Firth, Thos. & Brown, John, Ltd. 221.
Firth-Vickers Stainless Steels, Ltd. 221.
Foley, F. B. 166.
Ford Motor Company of Canada, Ltd. 26.
Franks, R. 166, 222.

Gagnebin, A. P. 165.
Goller, G. N. 221, 222.
Gordon, R. B. 26, 166, 221.
Gronningsaeter, A. M. 164.

Hanson - van Winkle-Munning Company, 26.
Harder, O. E. 94.
Harris, G. T. 93, 165, 166, 221, 222.
Harshaw Chemical Company, 164.
Higgins, W. F. 164.
Hignett, H. W. G. 92.
Horsburgh, G. D. L. 165.
Hull, F. C. 26, 166.

Illis, A. 219.
Imperial Chemical Industries, Ltd. 164.
International Nickel Company, Inc. 26, 165, 219.
International Nickel Company of Canada, Ltd. 25.

Jessop, William & Sons, Ltd. 93, 165, 166, 221, 222.
